

Dear Dr. Reese,

Thank you for sharing your wonderful speech about Science to us. I really enjoyed it. Only because you shared that speech, I finally understand why my mom's gold van is always hot inside when we get in it. I enjoyed hearing about the green garden because I love hearing about fruit, vegetables, and plants, also flowers.

When you were talking about those animals, it reminded me of the dolphins that my family met in Sea World at Texas.

My dream for the future is to be a teacher. Sometimes I pretend to play school and my stuffed animals are my students.

Sincerely, Megan

Dear Dr. Reese,

Thank you for coming to laurel hall. I learned that the Indians ate acorns. I enjoyed hearing about trees. I was reminded about how plastic bags are bad for the earth. Learning about trees is so interesting. My dream for the future is being a singer and dancer.

Sincerely, Charlotte

Dear Dr. Reese

Thank you for teaching me cool stuff about trees. I thought trees were boring until you came along. Now I know that Sequoia trees can survive up to three whow! lightning bolts! I even learned how earthquakes are formed and how birds hide their acorns. I also learned to be green like I could use cotton bags.

Sincerely,
Adrian

P.S My Dream is to be a Dr.

Dear Dr. Reese,

Thank you for sharing all that you said. I learned that what type of trees there are and how they are used. I enjoyed hearing about what happened back then and now to have 70 billion people. I was reminded about to not waste because millions of animals are dying from them. My dream for the future is being a scientist that studies rollercoasters and x-rays.

Your future scientist,
Cade Sancedo.

Dear Mr. Reese,

I learned so much from your presentation!
I learned that Oak Trees could stand very fierce
weather and have been around for a long time.
We also learned that a blue whale may 100
tons and the tree may much more than even
that! I know its good to reuse things so we
don't waste nature. Because I love trees etc. What
I want to be when I grow up is an artist.
Thanks for visiting my school!

Tracy

Jayna

Dear Dr. Reese

One important thing I learned from you is that people are polluting the sea.

What I want to be when I grow up is a zoo keeper.

What I want to do to ~~improve~~ make the world a better place is to stop people from cutting down trees.

Love, Jayna Joye

Letter to Dr. Reese
1. Important fact that
I learned.

2. My Dream for the
future.

I learned that more
people need to start caring
more about helping the
environment.

My dream for the future
is to make more electric
cars.

Dear Dr. Reese

I learned from you, and
one of the things was that
all the trash go out to
sea.

I want to tell you
my dream, that I
want to be a vet.
I want to save our animals.
