Dr Reese -- I JUST SAW YOU ON THE ED SHOW, WELL DONE. I AM A FELLOW OCEAN LOVER AND TURTLE PERSON, HAVE WORKED WITH THE ATLANTIC AND PACIFIC LEATHERBACK. I AM POSTING EVERYTHING I CAN FIND ABOUT THE SPILL. IT IS AWFUL TO SAY THE LEAST.

5) Hi, Dr Reese,
I heard you for the first time on the Ed Show (MSNBC), today. Thanks for the info. I did not realize the impact on medicines the oil disaster will have. I had only known about the impact on coastal wildlife and people's jobs, etc. I appreciate your work and passion for conservation. I would like very much to be on your friend list and be kept informed on your work and activities. Thanks so much.
Sincerely, Minelle Paloff."

6) Marnie Sue Hutchison Thanks for the add. Saw you on The Ed Show last night talking about the oil spill. You shed a bunch of new light on the topic. Thank you!

7) Marnie Sue Hutchison commented on your wall post:

"I agree with you 100 percent! Thanks for getting the word out on how important they are. I didn't know they provided us with so much medicine. I hope the corals can be saved somehow!!!!"

11) Hi Dr Reese,

After a late afternoon walk at Heritage Park and Glenmore Reservoir I tuned into MSNBC saw my conservation biologist friend on TV. What a nice surprise to watch your interview about catastrophic environmental consequences of the BP blowout.

Good show !

13) His response:

Dear Dr. Reese

Thanks I will do this and I will see what I can do from time to time..

Warm Regards
Bill

14) Dear Dr. Halter:

I've seen you on the Ed Show, and I ask you to PLEASE look at www.matteroftrust.org and find out about the possibility of collecting oil in natural, non-toxic human hair, (along with cat and dog fur). I know that it's not a solution, but at least it's not putting more toxins in the ocean. Can we get your help?

15) Dr. Halter,

Caught your appearance on the Ed show yesterday. Well done.

I saw a diver on TV recently saying that Florida's corals had been pretty well wiped out already. Unfortunate that it will get so much worse.

I hope this wakes the public up to the damage being done by drilling.

Cheers,

Richard Keppler

16) Dr Reese: Loved it. Hope you got some sleep. What were you doing up at 2a.m.? Oh, wait, that must have been ET. Anyway, looking good. Ed liked it too, I think. Well done. Joe Paraskevas

17) Dr Reese -- we saw your You Tube in Perth, Australia -- Great job mate! A sickening crisis.....

Curt Jenner

18) Dr Reese, Watched you with delight last night on The Ed Show -- My background: Producer: Coke, Miller and Wendy's commercials in the 80's. You are a producers dream 'On Camera' spokesperson.

Thank you, thank you, thank you,

24) Hi Dr Reese:

I was introduced to you the other day watching the Ed Show and loved the way you articulated the Gulf Oil Spill issues.

I am a graduate of California Lutheran University (then know as CLC) and the primary coordinator of the first Earth Day events held at the College in 1970. We actually had an entire week of programs that included participation by the whole city of Thousand Oaks back then.

I then went on to become the first ordained environmental minister in the nation if not the world and I trace my inspiration for this calling back to that Earth Day experience at Cal Lutheran.

Today, I am working at the Managing Director of a new campaign of the International Ocean Institute called the Waves of Change.

I would love to explore with you how you and students at CLU might be involved as well as how we might support your good work.

Be Well,

Dave Randle

25) Dr Reese,

Caught you on MSNB this a.m. talking about the oil disaster and the effects on coral and dispersants. Excellent. You are one intense individual, as am I when I'm talking about issues I feel passionate about. Hope you don't burn out. The world needs to hear you. Just heard a scientist on NPR talking about the same issue. Not nearly as effective as you. Keep talking!

30) Hello Dr Reese,
Saw you on MSNBC. I just wanted to say a big thank you for all that you do!

Dominique Larocque, M.A.

31) Dr Halter I saw you on MSNBC and love your passion and honesty. You have a lot to say and I would like to here more...

After watching 11 MSNBC clips on You Tube I conclude that you have a complete and realistic vision for this Gulf oil Problem. Thank you!!! I had no clue as to value of the corral in health care.
