

Witsuwit'en Yin Tah, Danowh' Yeh!

Welcome to *Witsuwit'en* territory!
Keepers of the great watershed *Widzin Kwah*,
Generations immemorial honouring *yin tah*, earth.
Land living, breathing beings, intelligent creatures,
Respect, understand, harmony, the natural world.

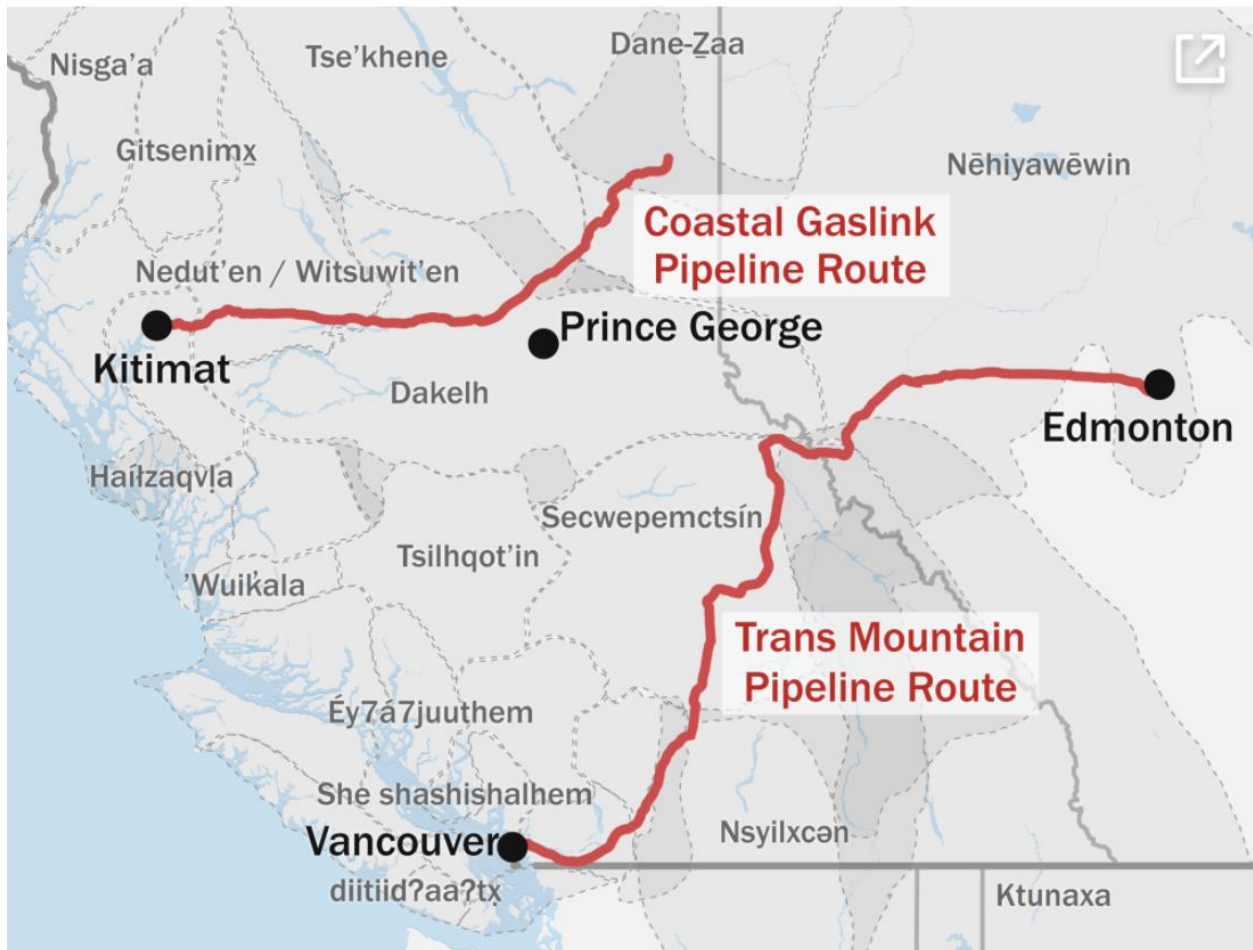

Concrete palface dishonours *Gidimt'en yin tah*, hereditary chiefs,
Fracturing *Dane-Zaa*, water poisoners, earth shakers,
Wolf slayers, great caribou ruinners, climate wreckers.
Burying ghastly leaky steel, Coastal Gaslink, black snake,
Odourless colourless lethal venom beneath Morice River.

Power, blue-green clear flowing water!
Canadian Supreme Court favours *Witsuwit'en* autonomy.
Above law, puppet Trudeau commands Coyote Camp raid,
Feds trespass, RCMP "Special Ops" ax doors, brutally seize
defenders,

Fascist bully galoots, gleeful Calgary Petroleum Club planet-killers.

Braggadocious forked oily tongues post Paris Agreement, Twenty-seven banks, pension funds, asset funds, teacher's funds, Insurance bemouths, Royal Dutch Shell, Petronas, PetroChina, Mitsubishi Corporation, Korean Gas Corporation, Hogs at \$47B trough, a subsidised Asian frenzy. Evil fascism. A mint, hideous climate fires, god-awful global famine. Frack off LNG Canada!

Plumping Alberta's Tar Sands and British Columbia's fracking gas across unceded Original Peoples territories is all in a day's work for Prime Minister Justin Trudeau's petroleum-backed Liberal Party. Credit: CBC

Across North America, pipelines leak on average every 4 kilometres (2.5mi). That means the Coastal Gaslink could leak in about 228 locations along its 670-kilometre (416mi) line. Credit: CBC

Agitate. Disrupt. Defend.
